Target Details	
Background:	Description: Receptor for cysteinyl leukotrienes. The response is mediated via a G-protein that
	activates a phosphatidylinositol-calcium second messenger system. Stimulation by BAY u9773,
	a partial agonist, induces specific contractions of pulmonary veins and might also have an
	indirect role in the relaxation of the pulmonary vascular endothelium. The rank order of affinities
	for the leukotrienes is LTC4 = LTD4 >> LTE4.
	Gene: CYSLTR2
Molecular Weight:	35 kDa
