Target Details	
Alternative Name:	MED27 (MED27 Products)
Background:	Description: Component of the Mediator complex, a coactivator involved in the regulated
	transcription of nearly all RNA polymerase II-dependent genes. Mediator functions as a bridge
	to convey information from gene-specific regulatory proteins to the basal RNA polymerase II
	transcription machinery. Mediator is recruited to promoters by direct interactions with
	regulatory proteins and serves as a scaffold for the assembly of a functional preinitiation
	complex with RNA polymerase II and the general transcription factors.
