Target Details

Target Details	
Alternative Name:	CD209 (CD209 Products)
Background:	Description: Pathogen-recognition receptor expressed on the surface of immature dendritic
	cells (DCs) and involved in initiation of primary immune response. Thought to mediate the
	endocytosis of pathogens which are subsequently degraded in lysosomal compartments. The
	receptor returns to the cell membrane surface and the pathogen-derived antigens are
	presented to resting T-cells via MHC class II proteins to initiate the adaptive immune response.
	Gene: CD209
