Datasheet for ABIN6260753 anti-CENPE antibody (C-Term)

Image

Overview

Quantity:	100 µL
Target:	CENPE
Binding Specificity:	C-Term
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This CENPE antibody is un-conjugated
Application:	Western Blotting (WB), ELISA

Product Details

Immunogen:	A synthesized peptide derived from human CENPE, corresponding to a region within C-terminal amino acids.
Isotype:	lgG
Specificity:	CENPE Antibody detects endogenous levels of total CENPE.
Predicted Reactivity:	Dog
Purification:	The antiserum was purified by peptide affinity chromatography using SulfoLink TM Coupling Resin (Thermo Fisher Scientific).
Target Details	

Target:

CENPE

Alternative Name:	CENPE (CENPE Products)
Background:	Description: Microtubule plus-end-directed kinetochore motor which plays an important role in
	chromosome congression, microtubule-kinetochore conjugation and spindle assembly
	checkpoint activation. Drives chromosome congression (alignment of chromosomes at the
	spindle equator resulting in the formation of the metaphase plate) by mediating the lateral
	sliding of polar chromosomes along spindle microtubules towards the spindle equator and by
	aiding the establishment and maintenance of connections between kinetochores and spindle
	microtubules (PubMed:7889940, PubMed:23891108, PubMed:25395579). The transport of
	pole-proximal chromosomes towards the spindle equator is favored by microtubule tracks that
	are detyrosinated (PubMed:25908662). Acts as a processive bi-directional tracker of dynamic
	microtubule tips, after chromosomes have congressed, continues to play an active role at
	kinetochores, enhancing their links with dynamic microtubule ends (PubMed:23955301).
	Suppresses chromosome congression in NDC80-depleted cells and contributes positively to
	congression only when microtubules are stabilized (PubMed:25743205). Plays an important
	role in the formation of stable attachments between kinetochores and spindle microtubules
	(PubMed:17535814) The stabilization of kinetochore-microtubule attachment also requires
	CENPE-dependent localization of other proteins to the kinetochore including BUB1B, MAD1 and
	MAD2. Plays a role in spindle assembly checkpoint activation (SAC) via its interaction with
	BUB1B resulting in the activation of its kinase activity, which is important for activating SAC.
	Necessary for the mitotic checkpoint signal at individual kinetochores to prevent aneuploidy
	due to single chromosome loss (By similarity).
	Gene: CENPE
Molecular Weight:	312 kDa
Gene ID:	1062
UniProt:	Q02224
Pathways:	M Phase, Maintenance of Protein Location
Application Details	
Application Notes:	WB 1:1000-3000, ELISA(peptide) 1:20000-1:40000
Restrictions:	For Research Use only
Handling	

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/3 | Product datasheet for ABIN6260753 | 09/10/2023 | Copyright antibodies-online. Handling

Concentration:	1 mg/mL
Buffer:	Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20 °C. Stable for 12 months from date of receipt.
Expiry Date:	12 months
