U	V	er	VI	е	W

Quantity:	100 μL	
Target:	CYP26B1	
Binding Specificity:	Internal Region	
Reactivity:	Human, Mouse, Rat	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This CYP26B1 antibody is un-conjugated	
Application:	plication: Western Blotting (WB), Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC)	

Product Details

Immunogen:	A synthesized peptide derived from human CYP26B1, corresponding to a region within the internal amino acids.
Isotype:	IgG
Specificity:	CYP26B1 Antibody detects endogenous levels of total CYP26B1.
Predicted Reactivity:	Pig,Bovine,Horse,Sheep,Rabbit,Dog
Purification:	The antiserum was purified by peptide affinity chromatography using SulfoLink TM Coupling Resin (Thermo Fisher Scientific).

Target Details

Target:	CYP26B1	

Target Details

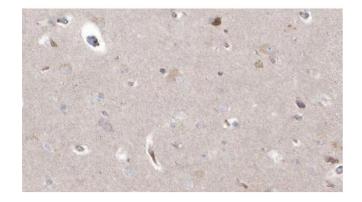

Alternative Name:	CYP26B1 (CYP26B1 Products)		
Background:	Description: Involved in the metabolism of retinoic acid (RA), rendering this classical		
	morphogen inactive through oxidation. Involved in the specific inactivation of all-trans-retinoic		
	acid (all-trans-RA), with a preference for the following substrates: all-trans-RA > 9-cis-RA > 13-		
	cis-RA. Generates several hydroxylated forms of RA, including 4-OH-RA, 4-oxo-RA, and 18-OH-		
	RA. Essential for postnatal survival. Plays a central role in germ cell development: acts by		
	degrading RA in the developing testis, preventing STRA8 expression, thereby leading to delay of		
	meiosis. Required for the maintenance of the undifferentiated state of male germ cells during		
	embryonic development in Sertoli cells, inducing arrest in G0 phase of the cell cycle and		
	preventing meiotic entry. Plays a role in skeletal development, both at the level of patterning and		
	in the ossification of bone and the establishment of some synovial joints.		
	Gene: CYP26B1		
Molecular Weight:	58-60 kDa		
Gene ID:	56603		
UniProt:	Q9NR63		
Pathways:	Retinoic Acid Receptor Signaling Pathway, Regulation of Muscle Cell Differentiation,		
	Monocarboxylic Acid Catabolic Process		
Application Details			
Application Notes:	WB 1:500-1:2000, IHC 1:50-1:200, IF/ICC 1:100-1:500		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Concentration:	1 mg/mL		
Buffer:	Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 %		
	glycerol.		
Preservative:	Sodium azide		
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which		
	should be handled by trained staff only.		
Storage:	-20 °C		

Handling

Storage Comment: Store at -20 °C. Stable for 12 months from date of receipt.

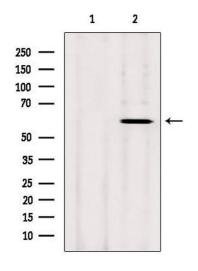

Expiry Date: 12 months

Immunohistochemistry

Image 1. ABIN6273038 at 1/100 staining Human brain cancer tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the antibody for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.

Western Blotting

Image 2. Western blot analysis of extracts from rat heart, using CYP26B1 antibody. Lane 1 was treated with the blocking peptide.

Western Blotting

Image 3. Western blot analysis of extracts of L02 cells, using CYP26B1 antibody.
