anti-EIF3L antibody (N-Term)

\sim				
	$ V \cap$	r\/I	19	٨

Quantity:	100 μL	
Target:	EIF3L	
Binding Specificity:	N-Term	
Reactivity:	Human, Mouse	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This EIF3L antibody is un-conjugated	
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC)	
Product Details		
Immunogen:	A synthesized peptide derived from human IF3EI, corresponding to a region within N-terminal amino acids.	
Isotype:	IgG	
Specificity:	IF3EI Antibody detects endogenous levels of total IF3EI.	
Predicted Reactivity:	Pig,Zebrafish,Bovine,Horse,Sheep,Rabbit,Dog,Chicken,Xenopus	
Purification:	The antiserum was purified by peptide affinity chromatography using SulfoLink TM Coupling Resin (Thermo Fisher Scientific).	
Target Details		
Target:	EIF3L	

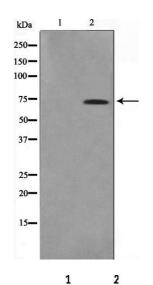

Target Details

Alternative Name:	EIF3L (EIF3L Products)	
Background:	Description: Component of the eukaryotic translation initiation factor 3 (eIF-3) complex, which	
	is required for several steps in the initiation of protein synthesis (PubMed:17581632,	
	PubMed:25849773, PubMed:27462815). The eIF-3 complex associates with the 40S ribosome	
	and facilitates the recruitment of eIF-1, eIF-1A, eIF-2:GTP:methionyl-tRNAi and eIF-5 to form the	
	43S pre-initiation complex (43S PIC). The eIF-3 complex stimulates mRNA recruitment to the	
	43S PIC and scanning of the mRNA for AUG recognition. The eIF-3 complex is also required for	
	disassembly and recycling of post-termination ribosomal complexes and subsequently	
	prevents premature joining of the 40S and 60S ribosomal subunits prior to initiation	
	(PubMed:17581632). The eIF-3 complex specifically targets and initiates translation of a subse	
	of mRNAs involved in cell proliferation, including cell cycling, differentiation and apoptosis, and	
	uses different modes of RNA stem-loop binding to exert either translational activation or	
	repression (PubMed:25849773).	
	Gene: EIF3L	
Molecular Weight:	67kDa	
Gene ID:	51386	
UniProt:	Q9Y262	
Pathways:	Ribonucleoprotein Complex Subunit Organization	
Application Details		
Application Notes:	WB 1:500-1:2000, IF/ICC 1:100-1:500, IHC 1:50-1:200, ELISA(peptide) 1:20000-1:40000	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Concentration:	1 mg/mL	
Buffer:	Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol.	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.	

Handling

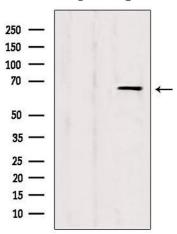

Storage:	-20 °C
Storage Comment:	Store at -20 °C. Stable for 12 months from date of receipt.
Expiry Date:	12 months

Images

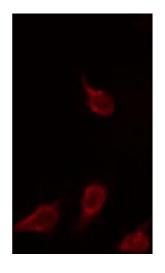

Western Blotting

Image 1. Western blot analysis on HuvEc cell lysate using IF3EI Antibody, The lane on the left is treated with the antigen-specific peptide.

Western Blotting

Image 2. Western blot analysis of extracts from HepG2, using IF3EI Antibody. Lane 1 was treated with the blocking peptide.

Immunofluorescence (fixed cells)

Image 3. ABIN6266925 staining HuvEc by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody.
