IRF3

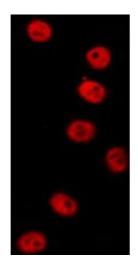

Target Details

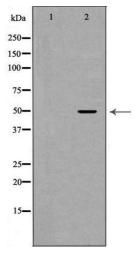

| Alternative Name: | IRF3 (IRF3 Products) | |
|---------------------|--|--|
| Background: | Description: Key transcriptional regulator of type I interferon (IFN)-dependent immune | |
| | responses which plays a critical role in the innate immune response against DNA and RNA | |
| | viruses. Regulates the transcription of type I IFN genes (IFN-alpha and IFN-beta) and IFN- | |
| | stimulated genes (ISG) by binding to an interferon-stimulated response element (ISRE) in their | |
| | promoters. Acts as a more potent activator of the IFN-beta (IFNB) gene than the IFN-alpha | |
| | (IFNA) gene and plays a critical role in both the early and late phases of the IFNA/B gene | |
| | induction. Found in an inactive form in the cytoplasm of uninfected cells and following viral | |
| | infection, double-stranded RNA (dsRNA), or toll-like receptor (TLR) signaling, is phosphorylated | |
| | by IKBKE and TBK1 kinases. This induces a conformational change, leading to its dimerization | |
| | and nuclear localization and association with CREB binding protein (CREBBP) to form dsRNA- | |
| | activated factor 1 (DRAF1), a complex which activates the transcription of the type I IFN and | |
| | ISG genes. Can activate distinct gene expression programs in macrophages and can induce | |
| | significant apoptosis in primary macrophages. | |

Immunofluorescence (fixed cells)

Image 1. ABIN6277154 staining HT29 cells by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25¡ãC. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37¡ãC. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) antibody(Cat.# S0006), diluted at 1/600, was used as secondary antibod

Western Blotting

Immunohistochemistry

Image 3. ABIN6277154 at 1/100 staining Human gastric tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the antibody for 1.5 hours at 22¡ãC. An HRP conjugated goat anti-rabbit antibody was used as the secondary
