Datasheet for ABIN6263293  
**anti-MMP13 antibody (N-Term)**

3 Images

### Overview

Quantity:	100 µL
Target:	MMP13
Binding Specificity:	N-Term
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This MMP13 antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), ELISA, Immunofluorescence (IF), Immunocytochemistry (ICC)

### Product Details

Immunogen:	A synthesized peptide derived from human MMP13, corresponding to a region within N-terminal amino acids.
Isotype:	IgG
Specificity:	MMP13 Antibody detects endogenous levels of total MMP13.
Purification:	The antiserum was purified by peptide affinity chromatography using SulfoLink™ Coupling Resin (Thermo Fisher Scientific).

### Target Details

Target:	MMP13
Alternative Name:	MMP13 ( <a href="#">MMP13 Products</a> )

## Target Details

---

Background:	<p>Description: Plays a role in the degradation of extracellular matrix proteins including fibrillar collagen, fibronectin, TNC and ACAN. Cleaves triple helical collagens, including type I, type II and type III collagen, but has the highest activity with soluble type II collagen. Can also degrade collagen type IV, type XIV and type X. May also function by activating or degrading key regulatory proteins, such as TGFB1 and CTGF. Plays a role in wound healing, tissue remodeling, cartilage degradation, bone development, bone mineralization and ossification. Required for normal embryonic bone development and ossification. Plays a role in the healing of bone fractures via endochondral ossification. Plays a role in wound healing, probably by a mechanism that involves proteolytic activation of TGFB1 and degradation of CTGF. Plays a role in keratinocyte migration during wound healing. May play a role in cell migration and in tumor cell invasion.</p> <p>Gene: MMP13</p>

## Application Details

---

Application Notes:	WB 1:500-1:2000, IHC 1:50-1:200, IF/ICC 1:100-1:500, ELISA(peptide) 1:20000-1:40000
--------------------	-------------------------------------------------------------------------------------

---

Restrictions:	For Research Use only
---------------	-----------------------

## Handling

---

Format:	Liquid
---------	--------

---

Concentration:	1 mg/mL
----------------	---------

---

Buffer:	Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol.
---------	-------------------------------------------------------------------------------------------------------

---

Preservative:	Sodium azide
---------------	--------------

---

Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
--------------------	------------------------------------------------------------------------------------------------------------------------

---

Storage:	-20 °C
----------	--------

---

Storage Comment:	Store at -20 °C. Stable for 12 months from date of receipt.
------------------	-------------------------------------------------------------

---

Expiry Date:	12 months

### Immunofluorescence (fixed cells)

**Image 1.** ABIN6276757 staining LOVO by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100, then blocked in 10% serum for 45 minutes at 25°C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody

### Immunohistochemistry

**Image 2.** ABIN6276757 at 1/100 staining Human Melanoma tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the antibody for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit antibody was used as the secondary

### Western Blotting

**Image 3.** Western blot analysis of LoVo cell lysate, using MMP13 Antibody. The lane on the left is treated with the antigen-specific peptide.
