## Target Details

Target:	PLSCR1
Alternative Name:	PLSCR1 ( <a href="#">PLSCR1 Products</a> )

## Target Details

Background:	Description: May mediate accelerated ATP-independent bidirectional transbilayer migration of phospholipids upon binding calcium ions that results in a loss of phospholipid asymmetry in the plasma membrane. May play a central role in the initiation of fibrin clot formation, in the activation of mast cells and in the recognition of apoptotic and injured cells by the reticuloendothelial system.  Gene: PLSCR1
Molecular Weight:	35 kDa
Gene ID:	5359
UniProt:	<a href="#">O15162</a>
Pathways:	<a href="#">Cellular Response to Molecule of Bacterial Origin</a>
