anti-PRMT1 antibody (C-Term)

\sim	
()\/\Di	view
	VICVV

Target:

Quantity:	100 μL
Target:	PRMT1
Binding Specificity:	C-Term
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This PRMT1 antibody is un-conjugated
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (IHC), Immunofluorescence (IF),
	Immunocytochemistry (ICC)
Product Details	
Immunogen:	A synthesized peptide derived from human PRMT1, corresponding to a region within C-terminal
	amino acids.
Isotype:	IgG
Specificity:	PRMT1 Antibody detects endogenous levels of total PRMT1.
Predicted Reactivity:	Pig,Zebrafish,Bovine,Horse,Rabbit,Dog,Chicken,Xenopus
Purification:	The antiserum was purified by peptide affinity chromatography using SulfoLink TM Coupling
	Resin (Thermo Fisher Scientific).
Target Details	
Target Details	

PRMT1

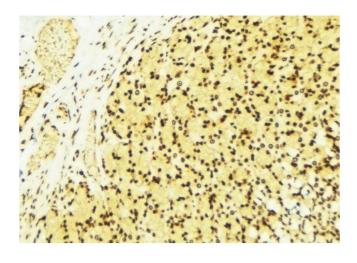

Target Details

Alternative Name:	PRMT1 (PRMT1 Products)
Background:	Description: Arginine methyltransferase that methylates (mono and asymmetric dimethylation)
	the guanidino nitrogens of arginyl residues present in proteins such as ESR1, histone H2, H3
	and H4, PIAS1, HNRNPA1, HNRNPD, NFATC2IP, SUPT5H, TAF15, EWS, HABP4 and SERBP1
	(PubMed:16879614). Constitutes the main enzyme that mediates monomethylation and
	asymmetric dimethylation of histone H4 'Arg-4' (H4R3me1 and H4R3me2a, respectively), a
	specific tag for epigenetic transcriptional activation. Together with dimethylated PIAS1,
	represses STAT1 transcriptional activity, in the late phase of interferon gamma (IFN-gamma)
	signaling. May be involved in the regulation of TAF15 transcriptional activity, act as an activator
	of estrogen receptor (ER)-mediated transactivation, play a key role in neurite outgrowth and act
	as a negative regulator of megakaryocytic differentiation, by modulating p38 MAPK pathway.
	Methylates FOXO1 and retains it in the nucleus increasing its transcriptional activity. Methylates
	CHTOP and this methylation is critical for its 5-hydroxymethylcytosine (5hmC)-binding activity
	(PubMed:25284789). Methylates H4R3 in genes involved in glioblastomagenesis in a CHTOP-
	and/or TET1-dependent manner (PubMed:25284789).
	Gene: PRMT1
Molecular Weight:	42kDa
Gene ID:	3276
UniProt:	Q99873
Application Details	
Application Notes:	WB 1:500-1:2000, IHC 1:50-1:200, IF/ICC 1:100-1:500, ELISA(peptide) 1:20000-1:40000
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 mg/mL
Buffer:	Rabbit IgG in phosphate buffered saline , pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Handling

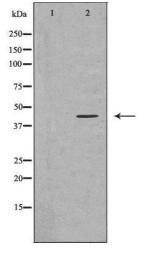

Storage:	-20 °C
Storage Comment:	Store at -20 °C. Stable for 12 months from date of receipt.
Expiry Date:	12 months

Immunohistochemistry

Image 1. ABIN6276469 at 1/100 staining Human gastric tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the antibody for 1.5 hours at $22_{\rm i}$ aC. An HRP conjugated goat anti-rabbit antibody was used as the secondary

Western Blotting

Image 2. Western blot analysis of Hela using PRMT1 antibody. The lane on the left is treated with the antigenspecific peptide.

Western Blotting

Image 3. Western blot analysis of extracts from 293, using PRMT1 Antibody. Lane 1 was treated with the blocking peptide.
