Alternative Name: Background:	RB1 (RB1 Products)
Background:	
	Description: Key regulator of entry into cell division that acts as a tumor suppressor. Promotes
	G0-G1 transition when phosphorylated by CDK3/cyclin-C. Acts as a transcription repressor of
	E2F1 target genes. The underphosphorylated, active form of RB1 interacts with E2F1 and
	represses its transcription activity, leading to cell cycle arrest. Directly involved in
	heterochromatin formation by maintaining overall chromatin structure and, in particular, that of
	constitutive heterochromatin by stabilizing histone methylation. Recruits and targets histone
	methyltransferases SUV39H1, KMT5B and KMT5C, leading to epigenetic transcriptional
	repression. Controls histone H4 'Lys-20' trimethylation. Inhibits the intrinsic kinase activity of
	TAF1. Mediates transcriptional repression by SMARCA4/BRG1 by recruiting a histone
	deacetylase (HDAC) complex to the c-FOS promoter. In resting neurons, transcription of the c-
	FOS promoter is inhibited by BRG1-dependent recruitment of a phospho-RB1-HDAC1 repressor
	complex. Upon calcium influx, RB1 is dephosphorylated by calcineurin, which leads to release
	of the repressor complex (By similarity). In case of viral infections, interactions with SV40 large
	T antigen, HPV E7 protein or adenovirus E1A protein induce the disassembly of RB1-E2F1
	complex thereby disrupting RB1's activity.

Immunofluorescence (fixed cells)

Image 1. ABIN6269101 staining MOLT by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody.

Immunohistochemistry

Image 2. ABIN6269101 at 1/100 staining Rat kidney tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the antibody for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.
