## Overview

|                      |                                      |
|----------------------|--------------------------------------|
| Quantity:            | 400 µL                               |
| Target:              | FUBP1                                |
| Binding Specificity: | AA 240-268, Center                   |
| Reactivity:          | Human, Mouse, Rat                    |
| Host:                | Rabbit                               |
| Clonality:           | Polyclonal                           |
| Conjugate:           | This FUBP1 antibody is un-conjugated |
| Application:         | Please inquire                       |

## Product Details

|            |                                                                                                                                                                     |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purpose:   | Rabbit Anti-FUBP1 (Center) Antibody                                                                                                                                 |
| Immunogen: | This FUBP1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 240-268 amino acids from the Central region of human FUBP1. |

## Target Details

|                   |                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | FUBP1                                                                                                                                                                                                                                                                                                                                                                         |
| Alternative Name: | FUBP1 ( <a href="#">FUBP1 Products</a> )                                                                                                                                                                                                                                                                                                                                      |
| Background:       | <p>Target Description: This gene encodes a ssDNA binding protein that activates the far upstream element (FUSE) of c-myc and stimulates expression of c-myc in undifferentiated cells.</p> <p>Regulation of FUSE by FUBP occurs through single-strand binding of FUBP to the non-coding strand. This protein has been shown to function as an ATP-dependent DNA helicase.</p> |

Target Details

|          |                        |
|----------|------------------------|
|          | Gene Symbol: FUBP1     |
| Gene ID: | 8880                   |
| UniProt: | <a href="#">Q96AE4</a> |

Application Details

|               |                       |
|---------------|-----------------------|
| Restrictions: | For Research Use only |
|---------------|-----------------------|

Handling

|                  |                                       |
|------------------|---------------------------------------|
| Storage:         | 4 °C,-20 °C                           |
| Storage Comment: | 2-8°C (short-term), -20°C (long-term) |
