Target Details	
Target:	CLCNKB
Alternative Name:	CLCNKB (CLCNKB Products)
Background:	Chloride channel Kb (CLCNKB) is a member of the CLC family of voltage-gated chloride
	channels, which comprises at least 9 mammalian chloride channels. Each is believed to have
	12 transmembrane domains and intracellular N and C termini. Mutations in CLCNKB result in

Target Details

	the autosomal recessive Type III Bartter Syndrome. CLCNKA and CLCNKB are closely related (94% sequence identity), tightly linked (separated by 11 kb of genomic sequence) and are both expressed in mammalian kidney.
Molecular Weight:	50 kDa (MW of target protein)
Application Details	
Application Notes:	WB: 0.25 μg/mL Optimal conditions should be determined by the investigator.
Comment:	CLCNKB Blocking Peptide, catalog no. 33R-5901, is also available for use as a blocking control in assays to test for specificity of this CLCNKB antibody
