

Datasheet for ABIN636480
anti-Thrombocyte antibody (FITC)

[Go to Product page](#)

Overview

Quantity:	2 mg
Target:	Thrombocyte
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Thrombocyte antibody is conjugated to FITC
Application:	Please inquire

Product Details

Immunogen:	Mouse thrombocyte antibody (FITC) was raised in rabbit using RBC-free mouse thymocytes as the immunogen.
Sterility:	Filtered

Target Details

Target:	Thrombocyte
Abstract:	Thrombocyte Products
Background:	Thymocytes are hematopoietic progenitor cells present in the thymus. Thymopoiesis is the process in the thymus by which thymocytes differentiate into mature T lymphocytes. The primary function of thymocytes is the generation of T lymphocytes (T cells). The thymus provides an inductive environment, which allows for the development and selection of physiologically useful T cells.

Application Details

Application Notes: Optimal conditions should be determined by the investigator.

Restrictions: For Research Use only

Handling

Concentration: Lot specific

Buffer: Supplied as a sterile filtered heteroantisera with NaN₃ add as a preservative..

Preservative: Sodium azide

Precaution of Use: This product contains Sodium Azide: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Handling Advice: Avoid repeated freeze/thaw cycles.
Product is photosensitive and should be protected from light.
Dilute only prior to immediate use.

Storage: -20 °C

Storage Comment: Aliquot and store at -20 °C.
