Reconstitution: Supplied as lyophilized and purified antibody originally containing PBS, without Preservative Stabilizers, liking Sodium Azide. Its final concentration is indicated in shipping vial. The antibody is stable for at least years from the date of receipt when stored at -20° C to -70° C.

Reconstituted antibody (suggested with sterile PBS) can also be aliquotted and stored frozen at -20° C to -70° C in a manual defrost freezer for months without detectable loss of activity. Upon reconstitution, the antibody can also be stored over months at 4° C. Please avoid freeze-thaw cycles.
