# Datasheet for ABIN6386057 **GPRASP1 IQ-ELISA Kit**

#### Overview

Quantity:	96 tests
Target:	GPRASP1
Reactivity:	Horse
Method Type:	Sandwich ELISA
Application:	ELISA
Product Details	
Purpose:	Equine Immunoquantitative (PCR-Based) GASP-1 ELISA Kit for cell culture supernatants,
	plasma, and serum samples.
Sample Type:	Cell Culture Supernatant, Plasma, Serum
Analytical Method:	Semi-Quantitative
Detection Method:	qPCR
Characteristics:	IQ-ELISAs employ specific capture antibodies coated on a 96-well PCR plate. Standards and
	samples are pipetted into the wells, the target protein in the standards and samples binds to
	the immobilized antibody. The wells are washed and the detection affinity reagent is added to
	the wells where it binds to any captured antigen. The wells are washed, and primers and PCR
	master mix are added to each well. The plate is placed into a real time PCR instrument for
	cycling and measurement of DNA amplification. The cycle number where amplification is
	detected is proportional to the amount of affinity detection reagent that bound to captured
	antigen in each well.
Components:	GASP-1 Microplate (Item A): 96 well PCR plate coated with anti-Equine GASP-1

## Target Details

Target:	GPRASP1
Alternative Name:	GASP-1 (GPRASP1 Products)
Application Details	
Application Notes:	The Immuno-Quantitative ELISA (IQELISA) kits are an innovative assay platform that combines the specificity and ease of use of an ELISA with the sensitivity of real-time PCR. This results in an assay that is simultaneously familiar and cutting edge and enables the use of only 1/10th the sample volume while also providing 10x more sensitivity than a traditional ELISA.
Comment:	The Immuno-Quantitative ELISA (IQELISA <sup>™</sup> ) kits are an innovative assay platform that combines the specificity and ease of use of an ELISA with the sensitivity of real-time PCR. Also called immuno-PCR, this detection platform results in an assay that is simultaneously familiar and cutting edge. Compared to traditional ELISA, IQELISA <sup>™</sup> enables the use of only 1/10th the sample volume while also providing 10x more sensitivity.
