

Datasheet for ABIN641180 **anti-Resistin antibody (C-Term)**

[Go to Product page](#)

Overview

Quantity:	200 µg
Target:	Resistin (RETN)
Binding Specificity:	C-Term
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Resistin antibody is un-conjugated
Application:	Western Blotting (WB), ELISA, Immunostaining (Ist), Immunoassay (IA), Dot Blot (DB), Cellular Assay (CA)

Product Details

Isotype:	IgG
Specificity:	The rabbit anti-human Resistin antibody detected specifically human recombinant protein and cellular protein from cell lysates at various concentrations. Cross reactivity with mouse and rat are expected from sequence similarity.

Target Details

Target:	Resistin (RETN)
Alternative Name:	Resistin (RETN Products)
NCBI Accession:	NP_065148
Pathways:	Feeding Behaviour , Smooth Muscle Cell Migration

Application Details

Restrictions: For Research Use only

Handling

Reconstitution: Supplied as purified and lyophilized antibody in sterile PBS (pH 7.5), containing 0.1% BSA. It final concentration is indicated in shipping vial. Please avoid freeze-thaw cycles.
