Handling

Reconstitution: Supplied as 100 µg of purified and lyophilized antibody. The antibody is stable for at least one year from the date of receipt when stored at -20° C to -70° C. Reconstituted antibody (suggesting with sterile PBS) can also be aliquotted and stored frozen at -20° C to -70° C in a manual defrost freezer for months without detectable loss activity. Upon reconstitution, the antibody can be stored at 4° C for 1 month. If 1 ml of PBS is used, the antibody concentration will be 100 µg/ml. Please avoid freeze-thaw cycles.
