## Target Details

Alternative Name:	UNC119 ( <a href="#">UNC119 Products</a> )
Background:	UNC119 is specifically expressed in the photoreceptors in the retina. The encoded product shares strong homology with the C. elegans unc119 protein and it can functionally complement the C. elegans unc119 mutation. It has been localized to the photoreceptor synapses in the outer plexiform layer of the retina, and suggested to play a role in the mechanism of photoreceptor neurotransmitter release through the synaptic vesicle cycle.

**Immunohistochemistry (Paraffin-embedded Sections)**

**Image 1.** Formalin-fixed and paraffin-embedded human testis tissue reacted with UN Antibody (Center) (ABIN653320 and ABIN2842812) , which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry, clinical relevance has not been evaluated.

**Western Blotting**

**Image 2.** Western blot analysis of UN Antibody (Center) (ABIN653320 and ABIN2842812) in mouse testis tissue lysates (35 µg/lane). UN (arrow) was detected using the purified Pab.
