Target Details	
Target:	SOX30
Alternative Name:	SOX30 (SOX30 Products)

This gene encodes a member of the SOX (SRY-related HMG-box) family of transcription factors

Target Details

	involved in the regulation of embryonic development and in the determination of the cell fate.
	The encoded protein may act as a transcriptional regulator after forming a protein complex
	with other proteins. The protein may be involved in the differentiation of developing male germ
	cells. Two transcript variants encoding distinct isoforms have been identified for this gene.
