## anti-GFAP R416WT antibody (AA 411-422) (PE)

$\sim$					
( )	VE	۲۱	/1	$\triangle$	Λ

Quantity:	100 μg	
Target:	GFAP R416WT	
Binding Specificity:	AA 411-422	
Reactivity:	Human	
Host:	Mouse	
Clonality:	Monoclonal	
Conjugate:	This GFAP R416WT antibody is conjugated to PE	
Application:	Immunohistochemistry (IHC), Western Blotting (WB), ELISA	
Product Details		
Immunogen:	Immunogen: Anti-GFAP R416WT Antibody was produced in mice by repeated immunizations with a synthetic peptide corresponding to amino acids 411-422 (KTVEMRDGEVIK) of human GFAP.  Immunogen Type: Peptide	
Immunogen:  Clone:	with a synthetic peptide corresponding to amino acids 411-422 (KTVEMRDGEVIK) of human GFAP.	
	with a synthetic peptide corresponding to amino acids 411-422 (KTVEMRDGEVIK) of human GFAP.  Immunogen Type: Peptide	
Clone:	with a synthetic peptide corresponding to amino acids 411-422 (KTVEMRDGEVIK) of human GFAP.  Immunogen Type: Peptide  \$206B-9	

#### Target Details

Target:	GFAP R416WT	
Abstract:	GFAP R416WT Products	
Background:	Synonyms: Glial fibrillary acidic protein, Intermediate filament protein, Astrocyte, gfapl,	
	DKFZp459C0729, MGC139638, FLJ45472, Al836096, GFAP antibody	
	Background: The 50 kDa type III intermediate filament protein glial fibrillary acidic protein	
	(GFAP) is a major structural component of astrocytes. GFAP associates with the calcium	
	binding protein annexin II-p2 and S-100. Association with these proteins together with	
	phosphorylation regulates GFAP polymerization. Astroycytes respond to brain injury by	
	proliferatin (astrogliosis), and one of the first events to occur during astrocyte proiliferation is	
	increased GFAP expression. Interestingly, antibodies to GFAP have been detected in individuals	
	with dementia. Anti-GFAP is ideal for investigators involved in Neuroscience Research, including	
	Alexander Disease, Oligodendroglioma, Cytoskleton Remolding Neurofilaments and PIP3/AKT	
	Signaling.	
	Gene Name: GFAP	
Gene ID:	2670	
UniProt:	P14136	

### **Application Details**

Application Notes:	Immunohistochemistry Dilution: User Optimized	
	Application Note: Anti-GFAP R416WT R-PE Conjugated Antibody is suitable for use in Western	
	blot, Immunohistochemistry and Immunocytochemistry. Expect a band approximately ${\sim}50~\text{kDa}$	
	on specific lysates or tissues. Specific conditions for reactivity should be optimized by the end	
	user.	
	ELISA Dilution: 1:10,000	
	Western Blot Dilution: 1:1000	
Restrictions:	For Research Use only	

### Handling

Format:	Liquid	
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2	
	Stabilizer: 50 % (v/v) Glycerol	
	0.1 % (w/v) Sodium Azide	

### Handling

Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.	
Storage:	4 °C	
Storage Comment:	Store vial at 4° C prior to opening. Dilute only prior to immediate use. This product is stable at C as an undiluted liquid. Use subdued lighting during handling and incubation of cells prior to analysis. Store reagent in the dark. DO NOT FREEZE.
