Target Details

Alternative Name:	Cas 9
Background:	Synonyms: rabbit anti-Cas9 antibody DyLight™ 800 conjugation, DyLight™ 800 conjugated rabbit
	anti-Cas9 antibody, Cas-9, Cas 9, CRISPR, CRISPR-associated endonuclease Cas9/Csn1,
	SpCas9, SpyCas9, csn1, Cas-9 Antibody
	Background: The Clustered Regularly Interspaced Short Palindromic Repeats (CRISPR) and
	CRISPR Associated (Cas) system was discovered in bacteria as a defense against foreign DNA,
	even being believed to act as a sort of prokaryotic immune system. The Cas9 protein is
	becoming a a useful tool in the field of genomic editing for its ability to induce site-directed
	double strand breaks in DNA. It can cleave almost any sequence complementary to the guide
	RNA and has recently been used for modifying the genome of human embryos for the first
	time.
	Gene Name: cas9
Gene ID:	901176
NCBI Accession:	NP_269215
UniProt:	Q99ZW2

Application Details

Application Notes:	Application Note: Cas9 DyLight™800 Conjugated Antibody has been tested for use in ELISA,
	Immunofluorescence, and western blotting. Specific conditions for reactivity should be
	optimized by the end user. Expect a band \sim 158 kDa in size corresponding to Cas-9 protein by
	western blotting in the appropriate cell lysate or extract.
	ELISA Dilution: 1:25,000-1:30,000
	Western Blot Dilution: 1 µg/mL
	IF Microscopy Dilution: 1 µg/mL
	Other Performance Data: User Optimized
Restrictions:	For Research Use only
