

Datasheet for ABIN6699026 Rabbit anti-Mouse IgG Antibody (DyLight 680)

Publication

Ονοηνίουν

1

Overview	
Quantity:	100 µg
Target:	lgG
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	DyLight 680
Application:	Western Blotting (WB), FLISA, Fluorescence Microscopy (FM)
Product Details	
Purpose:	Mouse IgG (H&L) Antibody DyLight™ 680 Conjugated
Immunogen:	Mouse IgG, whole molecule
Isotype:	IgG
Characteristics:	rabbit anti-Mouse IgG Antibody DyLight™ 680 conjugation, rabbit anti-Mouse IgG DyLight™680 conjugated Antibody,Anti-Mouse IgG DyLight 680 Antibody generated in rabbit detects reactivity to Mouse IgG.
Labeling Ratio:	2.8
Target Details	
Target:	lgG
Abstract:	IgG Products

Target Details

Target Type:AntibodyBackground:Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G
constitutes 75 % of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as
well as fungi and facilitates their destruction or neutralization via agglutination (and thereby
immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis.
The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor
proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy
and Light chains of the antibody molecule are present. Secondary Antibodies are available in a
variety of formats and conjugate types. When choosing a secondary antibody product,
consideration must be given to species and immunoglobulin specificity, conjugate type,
fragment and chain specificity, level of cross-reactivity, and host-species source and fragment
composition.

Application Details

Application Notes:	FLISA_Dilution: >1:20,000	
	IF_Microscopy_Dilution: >1:5,000	
	Western_Blot_Dilution: >1:10,000	
	Other: User Optimized	
Comment:	This product is designed for immunofluorescence microscopy, fluorescence based plate	
	assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex	
	analysis, including multicolor imaging, utilizing various commercial platforms. The emission	
	spectra for this DyLight™ conjugate match the principle output wavelengths of most common	
	fluorescence instrumentation.	
	Suggested Applications: WB	
Restrictions:	For Research Use only	
Handling		
Format:	Lyophilized	
Reconstitution:	Reconstitution Volume: 100 µL	
	Reconstitution Buffer: Restore with deionized water (or equivalent)	
Concentration:	1.0 mg/mL	
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 10 mg/mL Bovine Serum	
	Albumin (BSA) - Immunoglobulin and Protease free, 0.01 % (w/v) Sodium Azide

		<u> </u>

Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which
	should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Store conjugated secondary antibody at 4° C prior to restoration. For extended storage aliquot
	contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge
	product if not completely clear after standing at room temperature. Conjugated Secondary
	Antibody is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate
	USE.
Expiry Date:	12 months
