Quantity:

Target: IgG Reactivity: Rabbit Host: Goat Clonality: Polyclonal Conjugate: DyLight 649 Application: Western Blotting (WB), FLISA, Fluorescence Microscopy (FM), Dot Blot (DB) Product Details Purpose: Rabbit IgG (H&L) Antibody DyLight** 649 Conjugated Immunogen: Rabbit IgG whole molecule Isotype: IgG Characteristics: Goat anti-Rabbit IgG Antibody DyLight**649 Conjugation, Goat anti-Rabbit IgG DyLight**649 Conjugated Antibody,Anti-Rabbit IgG (H&L) DyLight 649 Antibody generated in goat detects reactivity to Rabbit IgG. Purification: This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by conjugation to fluorochrome and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted a single precipitin arc against anti-Goat Serum, Rabbit IgG and Rabbit Serum. This antibody we react with heavy chains of Rabbit IgG and with light chains of most Rabbit immunoglobulins. Labeling Ratio: 3.1				
Host: Goat Clonality: Polyclonal Conjugate: DyLight 649 Application: Western Blotting (WB), FLISA, Fluorescence Microscopy (FM), Dot Blot (DB) Product Details Purpose: Rabbit IgG (H&L) Antibody DyLight™ 649 Conjugated Immunogen: Rabbit IgG whole molecule Isotype: IgG Characteristics: Goat anti-Rabbit IgG Antibody DyLight™ 649 Conjugation, Goat anti-Rabbit IgG DyLight™ 649 Conjugated Antibody,Anti-Rabbit IgG (H&L) DyLight 649 Antibody generated in goat detects reactivity to Rabbit IgG. Purification: This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by conjugation to fluorochrome and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted a single precipitin arc against anti-Goat Serum, Rabbit IgG and Rabbit Serum. This antibody react with heavy chains of Rabbit IgG and with light chains of most Rabbit immunoglobulins.	Target:	IgG		
Clonality: Polyclonal Conjugate: DyLight 649 Application: Western Blotting (WB), FLISA, Fluorescence Microscopy (FM), Dot Blot (DB) Product Details Purpose: Rabbit IgG (H&L) Antibody DyLight™ 649 Conjugated Immunogen: Rabbit IgG whole molecule Isotype: IgG Characteristics: Goat anti-Rabbit IgG Antibody DyLight™ 649 Conjugation, Goat anti-Rabbit IgG DyLight™ 649 Conjugated Antibody,Anti-Rabbit IgG (H&L) DyLight 649 Antibody generated in goat detects reactivity to Rabbit IgG. Purification: This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by conjugation to fluorochrome and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted a single precipitin arc against anti-Goat Serum, Rabbit IgG and Rabbit Serum. This antibody we react with heavy chains of Rabbit IgG and with light chains of most Rabbit immunoglobulins.	Reactivity:	Rabbit		
Conjugate: DyLight 649 Application: Western Blotting (WB), FLISA, Fluorescence Microscopy (FM), Dot Blot (DB) Product Details Purpose: Rabbit IgG (H&L) Antibody DyLight™ 649 Conjugated Immunogen: Rabbit IgG whole molecule Isotype: IgG Characteristics: Goat anti-Rabbit IgG Antibody DyLight™ 649 Conjugation, Goat anti-Rabbit IgG DyLight™ 649 Conjugated Antibody,Anti-Rabbit IgG (H&L) DyLight 649 Antibody generated in goat detects reactivity to Rabbit IgG. Target Details

Target:	IgG	
Abstract:	IgG Products	
Target Type:	Antibody	
Background:	Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75 % of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy and Light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.	
Application Details		
Application Notes:	FLISA_Dilution: >1:20,000 IF_Microscopy_Dilution: >1:5,000 Western_Blot_Dilution: >1:10,000 Other: User Optimized	
Comment:	Anti-Rabbit IgG (H&L) DyLight 649 Antibody has been tested by dot blot and western blot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation. Suggested Applications: IF, Multiplex	
Restrictions:	For Research Use only	
Handling		
Format:	Lyophilized	
Reconstitution:	Reconstitution Volume: 100 μL	

Reconstitution Buffer: Restore with deionized water (or equivalent)

Handling

Concentration:	1.0 mg/mL	
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 10 mg/mL Bovine Serum	
	Albumin (BSA) - Immunoglobulin and Protease free, 0.01 % (w/v) Sodium Azide	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which	
	should be handled by trained staff only.	
Storage:	4 °C,-20 °C	
Storage Comment:	Store conjugated secondary antibody at 4° C prior to restoration. For extended storage aliquot	
	contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge	
	product if not completely clear after standing at room temperature. Conjugated Secondary	
	Antibody is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate	
	use.	
Expiry Date:	12 months
