Go to Product page

Overview

Quantity:	5 µg
Target:	MIF
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Application:	SDS-PAGE (SDS)

Product Details

Purpose:	Human Migration Inhibitory Factor Recombinant Protein
Purification:	Migration Inhibitory Factor purity was determined to be greater than 97% as determined by HpLC, analysis by UV-Spectroscopy at 280nm, and by reducing and non-reducing SDS-pAGE.
Purity:	97,00%
Endotoxin Level:	Measured by LAL is typically \leq 1 EU/µg protein.
Biological Activity Comment:	The activity was measured in an agarose microdroplet assay using human U937 and production of IL-8 by human PBMCs.

Target Details

Target:	MIF
Alternative Name:	MIF (MIF Products)
Background:	Synonyms: Glycosylation-inhibiting factor (GIF), L-dopachrome isomerase, L-dopachrome
	tautomerase, Phenylpyruvate tautomerase

	Background: Migration Inhibitory Factor (MIF) is a pro-inflammatory cytokine that acts on fibroblasts by inducing IL-1, IL-8 and MMP expression. MIF stimulates NO production and TNF α release following IFNγ-activation of macrophages. Recombinant human MIF is a non- glycosylated protein, containing 115 amino acids, with a molecular weight of 12.5 kDa.
UniProt:	P07141
Pathways:	Regulation of Systemic Arterial Blood Pressure by Hormones, Positive Regulation of Immune Effector Process, Production of Molecular Mediator of Immune Response, Regulation of Carbohydrate Metabolic Process, Feeding Behaviour, Smooth Muscle Cell Migration, Negative Regulation of intrinsic apoptotic Signaling
Application Details	
Application Notes:	Other: User Optimized Application_Note: Migration Inhibitory Factor Recombinant Protein has been tested by SDS- PAGE and biological activity and is suitable as a control for polyclonal or monoclonal anti- Migration Inhibitory Factor in immunological assays.
Comment:	Suggested_Applications: Cellular Assay Other_Performance_Data:
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Reconstitution:	Reconstitution_Buffer: Restore with deionized water (or equivalent) Reconstitution_Volume: 5 µL (5-50 µL)
Buffer:	Buffer: 0.01 M Sodium Phosphate, pH 7.5 Stabilizer: None
Preservative:	Without preservative
Storage:	4 °C,-20 °C
Storage Comment:	Store vial at 4° C prior to restoration. Dilute only prior to immediate use. Maintain sterility. This product DOES NOT contain preservative. DO NOT VORTEX. We recommend adding a carrier protein such as HSA or BSA to 0.1% (i.e. 1.0 mg/mL). For best results aliquot contents and freeze at -20° C or colder. Avoid cycles of freezing and thawing. Centrifuge vial before each opening to dislodge contents from the cap and to clarify if contents are not clear after standing.
