

Datasheet for ABIN6700573 14-3-3 sigma/SFN Protein (GST tag)

Overview

0000000	
Quantity:	20 µg
Target:	14-3-3 sigma/SFN (SFN)
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This 14-3-3 sigma/SFN protein is labelled with GST tag.
Application:	Western Blotting (WB)
Product Details	
Purpose:	14-3-3 sigma recombinant protein-GST fusion protein
Purification:	Recombinant full-length human 14-3-3 σ was expressed in E. coli cells using an N-Terminal Glutathione-S-Transferase fusion protein. The purity was determined to be >90% by densitometry.
Purity:	>90%
Target Details	
Target:	14-3-3 sigma/SFN (SFN)
Alternative Name:	YWHAS (SFN Products)
Background:	Synonyms: 14-3-3 sigma, SFN, stratifin, YWHAS Background: 14-3-3σ or stratifin is a protein that is strongly induced by gamma irradiation and other DNA-damaging agents (1). The induction of 14-3-3σ is mediated by a p53 responsive

	element. Exogenous introduction of 14-3-3ơ into cycling cells results in a G2 cell cycle arrest
	(2). Knockout of 14-3-3 σ in cells showed that the cells are unable to maintain cell cycle arrest
	after DNA damage. The 14-3-3 σ -/- cells die as they enter mitosis. This process is associated
	with a failure of the 14-3-3 σ -deficient cells to sequester the proteins that initiate mitosis and
	prevent them from entering the nucleus. Thus, 14-3-3 σ plays an important role in maintaining
	the G2 checkpoint in cells and preventing mitotic death. 14-3-3 σ Protein is ideal for
	investigators involved in Cell Stress& Chaperone Proteins, AKT/PKB Pathway, Cancer, Cell
	Cycle, Cellular Stress, ERK/MAPK Pathway, Neurobiology, PKA/PKC Pathway, and WNT
	Signaling research.
NCBI Accession:	NM_006826
Pathways:	p53 Signaling, Myometrial Relaxation and Contraction
Application Details	
Application Notes:	Western_Blot_Dilution: User Optimized
	Application_Note: 14-3-3 σ Protein is suitable for use in Western Blot. Expect a band
	approximately \sim 51 kDa on specific lysates or tissues. Specific conditions for reactivity should
	be optimized by the end user.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	0.2 µg/µL
Buffer:	14-3-3σ Protein is stored in 50 mM Tris-HCl, pH 7.5, 150 mM NaCl, 10 mM glutathione, 0.1 mM
	EDTA, 0.25 mM DTT, 0.1 mM PMSF, 25 % glycerol.
Storage:	-80 °C
Storage Comment:	Store product at -70°C. For optimal storage, aliquot target into smaller quantities after
	centrifugation and store at recommended temperature. For most favorable performance, avoid
	repeated handling and multiple freeze/thaw cycles.
Expiry Date:	12 months
