## Target Details

**Background:** Synonyms: HHV 8, Human Herpes Virus 8, Human herpesvirus 8, HHV8 ORF50, Kaposi's sarcoma associated herpes virus, Kaposi's sarcoma associated herpesvirus, KSHV, replication and transcription activator, RTA

Background: HHV8 has been found to be associated with three different diseases observed in AIDS patients, kaposi's sarcoma, primary effusion lymphoma (which is a rare type of non-Hodgkin lymphoma affecting the body cavities) and multicentric Castleman's disease. To date there is much evidence to support a direct role for HHV8 in kaposi's sarcoma.
