# Datasheet for ABIN6730940 Angiopoietin 2 ELISA Kit

5 Images

3 Publications

## Overview

Quantity:	96 tests
Target:	Angiopoietin 2 (ANGPT2)
Reactivity:	Rat
Method Type:	Sandwich ELISA
Detection Range:	12.5 pg/mL - 800 pg/mL
Minimum Detection Limit:	12.5 pg/mL
Application:	ELISA
Product Details	
Purpose:	The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of ANGPT2
	in rat serum, plasma, tissue homogenates.
	We offer <b>validation data</b> (WB) for the kit components. So you can be sure to order a reliable
	ELISA kit product composed of high quality reagents.
Sample Type:	Plasma, Serum, Tissue Homogenate
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This assay has high sensitivity and excellent specificity for detection of Angiopoietin 2 (ANGPT2)
Cross-Reactivity (Details):	No significant cross-reactivity or interference between Angiopoietin 2 (ANGPT2) and analogues was observed.

## Product Details

Sensitivity:	5.2 pg/mL
Components:	Pre-coated, ready to use 96-well strip plate, flat buttom
	Plate sealer for 96 wells
	Reference Standard
	Standard Diluent
	Detection Reagent A
	Detection Reagent B
	Assay Diluent A
	Assay Diluent B
	Reagent Diluent (if Detection Reagent is lyophilized)
	TMB Substrate
	Stop Solution
	Wash Buffer (30 x concentrate)
	Instruction manual

## Target Details

Target:	Angiopoietin 2 (ANGPT2)
Abstract:	ANGPT2 Products
UniProt:	035462
Pathways:	RTK Signaling
Application Details	
Comment:	Information on standard material:
	The standard might be recombinant protein or natural protein, that will depend on the specific
	kit. Moreover, the expression system is E.coli or yeast or mammal cell. There is 0.05% proclin
	300 in the standard as preservative.
	Information on reagents:
	The stop solution used in the kit is sulfuric acid with concentration of 1 mol/L. And the wash
	solution is TBS. The standard diluent contains 0.02 % sodium azide, assay diluent A and assay
	diluent B contain 0.01% sodium azide. Some kits can contain is BSA in them.
	Information on antibodies:
	The provided antibodies and their host vary in different kits.
Sample Volume:	100 μL

## Application Details

Assay Time:	3 h
Plate:	Pre-coated
Protocol:	1. Prepare all reagents, samples and standards,
	2. Add 100 $\mu$ L standard or sample to each well. Incubate 1 hours at 37 °C,
	3. Aspirate and add 100 $\mu$ L prepared Detection Reagent A. Incubate 1 hour at 37 °C,
	4. Aspirate and wash 3 times,
	5. Add 100 $\mu$ L prepared Detection Reagent B. Incubate 30 minutes at 37 °C,
	6. Aspirate and wash 5 times,
	7. Add 90 $\mu$ L Substrate Solution. Incubate 10-20 minutes at 37 °C,
	8. Add 50µL Stop Solution. Read at 450nm immediately.
Reagent Preparation:	1. Bring all kit components and samples to room temperature (18-25 °C) before use.
	2. Standard - Reconstitute the Standard with 1.0 mL of Standard Diluent, keep for 10 minutes at
	room temperature, shake gently (not to foam). The concentration of the standard in the stocl
	solution is 8,000pg/mL. Firstly dilute the stock solution to 800pg/mL and the diluted
	standard serves as the highest standard (800pg/mL). Then prepare 7 tubes containing
	0.5 mL Standard Diluent and use the diluted standard to produce a double dilution series. Mix
	each tube thoroughly before the next transfer. Set up 7 points of diluted standard such as
	800pg/mL, 400pg/mL, 200pg/mL, 100pg/mL, 50pg/mL, 25pg/mL, 12.5pg/mL, and the last
	microcentrifuge tube with Standard Diluent is the blank as 0pg/mL.
	3. Detection Reagent A and Detection Reagent B - Briefly spin or centrifuge the stock Detection
	A and Detection B before use. Dilute to the working concentration with Assay Diluent A and B respectively (1:100).
	4. Wash Solution - Dilute 20 mL of Wash Solution concentrate (30x) with 580 mL of deionized or distilled water to prepare 600 mL of Wash Solution (1x).
	5. TMB substrate - Aspirate the needed dosage of the solution with sterilized tips and do not
	dump the residual solution into the vial again.
	Note:
	1. Making serial dilution in the wells directly is not permitted.
	<ol> <li>Prepare standard within 15 minutes before assay. Please do not dissolve the reagents at 37 °C directly.</li> </ol>
	3. Please carefully reconstitute Standards or working Detection Reagent A and B according to
	the instruction, and avoid foaming and mix gently until the crystals are completely dissolved.
	To minimize imprecision caused by pipetting, use small volumes and ensure that pipettors
	are calibrated. It is recommended to suck more than 10µL for once pipetting.
	<ol> <li>The reconstituted Standards, Detection Reagent A and Detection Reagent B can be used only once.</li> </ol>
	5. If crystals have formed in the Wash Solution concentrate (30x), warm to room temperature
	and mix gently until the crystals are completely dissolved.
	6. Contaminated water or container for reagent preparation will influence the detection result.

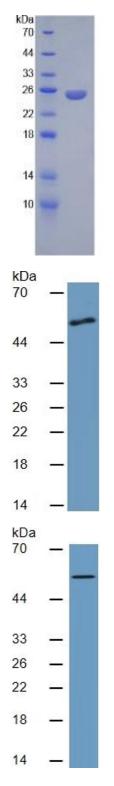

ot in therange of the standard curve, the optimal sample dilution for the particular iment has to be determined.Samples should then be diluted with PBS (pH =7.0-7.2). say Precision (Precision within an assay): 3 samples with low, middle and high level of vere tested 20 times on one plate, respectively. say Precision (Precision between assays): 3 samples with low, middle and high level of vere tested on 3 different plates, 8 replicates in each plate. Precaution of Use:	The Stop Solution suggested for use with this kit is an acid solution. Wear eye, hand, face, and
	clothing protection when using this material.
Storage:	4 °C/-20 °C
Storage Comment:	<ol> <li>For unopened kit: All reagents should be stored according to the labels on the vials. The Standard, Detection Reagent A, Detection Reagent B, and 96-well Strip Plate should be stored at -20 °C upon receipt, while the other reagents should be stored at 4 °C.</li> <li>For opened kits: the remaining reagents must be stored according to the above storage conditions. In addition, please return the unused wells to the foil pouch containing the desiccant and seal the foil pouch with the zipper.</li> </ol>
Expiry Date:	6 months
