## Overview

|                      |                                                                        |
|----------------------|------------------------------------------------------------------------|
| Quantity:            | 500 µg                                                                 |
| Target:              | CCL4                                                                   |
| Binding Specificity: | AA 1-69                                                                |
| Reactivity:          | Rat                                                                    |
| Host:                | Rabbit                                                                 |
| Clonality:           | Polyclonal                                                             |
| Conjugate:           | This CCL4 antibody is un-conjugated                                    |
| Application:         | Western Blotting (WB), Immunoprecipitation (IP), Neutralization (Neut) |

## Product Details

|                   |                                                          |
|-------------------|----------------------------------------------------------|
| Immunogen:        | E. coli-expressed amino acids 1-69 of mature rat MIP-1b. |
| Specificity:      | Reacts with both mouse and rat natural MIP-1b.           |
| Cross-Reactivity: | Mouse (Murine)                                           |
| Purification:     | Protein A Column                                         |

## Target Details

|                   |                                                                                                                                                                                    |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | CCL4                                                                                                                                                                               |
| Alternative Name: | CCL4 / SYCA4 ( <a href="#">CCL4 Products</a> )                                                                                                                                     |
| Background:       | Standard Gene Symbol: CCL4, Gene Family: Intercrine, Gene Subfamily: Intercrine beta,<br>Synonyms: CCL4, ACT2, Act-2, AT744.1, C-C motif chemokine 4, Chemokine (C-C motif) ligand |

### Target Details

|          |                                                                                                                                                                                                                                                               |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          | 4, CC chemokine ligand 4, HC21, LAG1, MIP1B, MIP1B1, LAG-1, SCYA2, Secreted protein G-26, SIS-gamma, MIP-1-beta, MIP-1-beta(1-69), Small-inducible cytokine A4, T-cell activation protein 2, G-26, Lymphocyte-activation gene 1, PAT 744, Protein H400, SCYA4 |
| Gene ID: | 6351                                                                                                                                                                                                                                                          |
| UniProt: | <a href="#">P13236</a>                                                                                                                                                                                                                                        |

### Application Details

|                    |                               |
|--------------------|-------------------------------|
| Application Notes: | IP (1:500), Neut, WB (1:2000) |
| Restrictions:      | For Research Use only         |

### Handling

|                  |                                                          |
|------------------|----------------------------------------------------------|
| Format:          | Lyophilized                                              |
| Reconstitution:  | deionized water                                          |
| Storage:         | 4 °C/-20 °C                                              |
| Storage Comment: | Long term: Add glycerol (40-50%) -20°C, Short term: +4°C |
