Target Details

Background:	Synonyms: Tropomyosin beta chain, Beta-tropomyosin, Tropomyosin-2, TPM2, TMSB, DA1A, DA2B, NEM4, AMCD1, HEL-S-273 Background: Binds to actin filaments in muscle and non-muscle cells. Plays a central role, in association with the troponin complex, in the calcium dependent regulation of vertebrate striated muscle contraction. Smooth muscle contraction is regulated by interaction with caldesmon. In non-muscle cells is implicated in stabilizing cytoskeleton actin filaments. The non-muscle isoform may have a role in agonist-mediated receptor internalization.
