# anti-TNFAIP3 antibody (AA 51-150)

**Images** 

#### Overview

Quantity:	100 μL
Target:	TNFAIP3
Binding Specificity:	AA 51-150
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This TNFAIP3 antibody is un-conjugated
Application:	ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))

# Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human TNFAIP3
Isotype:	IgG
Cross-Reactivity:	Human, Mouse, Rat
Predicted Reactivity:	Dog,Cow,Pig,Horse
Purification:	Purified by Protein A.

#### **Target Details**

Target: TNFAIP3

Alternative Name:	TNFAIP3 (TNFAIP3 Products)
Background:	Synonyms: A20, OTUD7C, TNFA1P2, Tumor necrosis factor alpha-induced protein 3, TNF alpha induced protein 3, OTU domain-containing protein 7C, Putative DNA-binding protein A20, Zinc finger protein A20, TNFAIP3
	Background: Ubiquitin-editing enzyme that contains both ubiquitin ligase and deubiquitinase
	activities. Involved in immune and inflammatory responses signaled by cytokines, such as TNF
	alpha and IL-1 beta, or pathogens via Toll-like receptors (TLRs) through terminating NF-kappa-E
	activity. Essential component of a ubiquitin-editing protein complex, comprising also RNF11,
	ITCH and TAX1BP1, that ensures the transient nature of inflammatory signaling pathways. In
	cooperation with TAX1BP1 promotes disassembly of E2-E3 ubiquitin protein ligase complexes
	in IL-1R and TNFR-1 pathways, affected are at least E3 ligases TRAF6, TRAF2 and BIRC2, and
	E2 ubiquitin-conjugating enzymes UBE2N and UBE2D3. In cooperation with TAX1BP1 promotes
	ubiquitination of UBE2N and proteasomal degradation of UBE2N and UBE2D3. Upon TNF
	stimulation, deubiquitinates 'Lys-63'-polyubiquitin chains on RIPK1 and catalyzes the formation
	of 'Lys-48'-polyubiquitin chains. This leads to RIPK1 proteasomal degradation and consequently
	termination of the TNF- or LPS-mediated activation of NF-kappa-B. Deubiquitinates TRAF6
	probably acting on 'Lys-63'-linked polyubiquitin. Upon T-cell receptor (TCR)-mediated T-cell
	activation, deubiquitinates 'Lys-63'-polyubiquitin chains on MALT1 thereby mediating
	disassociation of the CBM (CARD11:BCL10:MALT1) and IKK complexes and preventing
	sustained IKK activation. Deubiquitinates NEMO/IKBKG, the function is facilitated by TNIP1 and
	leads to inhibition of NF-kappa-B activation. Upon stimulation by bacterial peptidoglycans,
	probably deubiquitinates RIPK2. Can also inhibit I-kappa-B-kinase (IKK) through a non-catalytic
	mechanism which involves polyubiquitin, polyubiquitin promotes association with IKBKG and
	prevents IKK MAP3K7-mediated phosphorylation. Targets TRAF2 for lysosomal degradation. In
	vitro able to deubiquitinate 'Lys-11'-, 'Lys-48'- and 'Lys-63' polyubiquitin chains. Inhibitor of
	programmed cell death.
Gene ID:	7128
UniProt:	P21580
Pathways:	TLR Signaling, Activation of Innate immune Response, Cellular Response to Molecule of
	Bacterial Origin, Production of Molecular Mediator of Immune Response
Application Details	
Application Notes:	ELISA 1:500-1000
• •	IHC-P 1:200-400

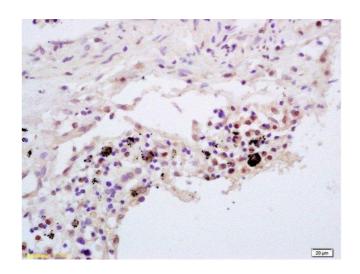

## **Application Details**

	IHC-F 1:100-500
	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only

# Handling

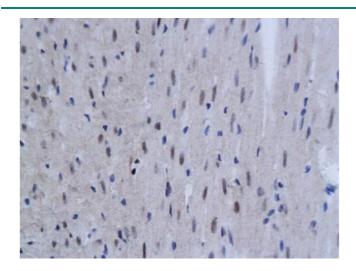

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	0.01M TBS( pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.
Expiry Date:	12 months
