## anti-Alcohol Dehydrogenase (ADH) antibody (Alexa Fluor 488)

[Go to Product page](#)

### Overview

|              |                             |
|--------------|-----------------------------|
| Quantity:    | 100 µL                      |
| Target:      | Alcohol Dehydrogenase (ADH) |
| Reactivity:  | Human, Mouse, Rat           |
| Host:        | Rabbit                      |
| Clonality:   | Monoclonal                  |
| Conjugate:   | Alexa Fluor 488             |
| Application: | Please inquire              |

### Product Details

|                   |                                           |
|-------------------|-------------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus)       |
| Characteristics:  | Alcohol Dehydrogenase Conjugated Antibody |

### Target Details

|                   |                                                        |
|-------------------|--------------------------------------------------------|
| Target:           | Alcohol Dehydrogenase (ADH)                            |
| Alternative Name: | Alcohol Dehydrogenase ( <a href="#">ADH Products</a> ) |

### Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF488 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
