## Recombinant anti-STAU1/Staufen antibody (Alexa Fluor 488)

[Go to Product page](#)

### Overview

|                |                                                              |
|----------------|--------------------------------------------------------------|
| Quantity:      | 100 µL                                                       |
| Target:        | STAU1/Staufen (STAU1)                                        |
| Reactivity:    | Human, Rat, Mouse                                            |
| Host:          | Rabbit                                                       |
| Antibody Type: | Recombinant Antibody                                         |
| Clonality:     | Monoclonal                                                   |
| Conjugate:     | This STAU1/Staufen antibody is conjugated to Alexa Fluor 488 |
| Application:   | Please inquire                                               |

### Product Details

|                   |                                     |
|-------------------|-------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus) |
| Characteristics:  | Staufen Conjugated Antibody         |

### Target Details

|                   |                                                 |
|-------------------|-------------------------------------------------|
| Target:           | STAU1/Staufen (STAU1)                           |
| Alternative Name: | Staufen ( <a href="#">STAU1 Products</a> )      |
| Pathways:         | <a href="#">Asymmetric Protein Localization</a> |

### Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF488 conjugated: most applications: 1: 50 - 1: 250 |
|--------------------|-----------------------------------------------------|

Application Details

---

Restrictions: For Research Use only

Handling

---

Storage: 4 °C

---

Storage Comment: Store at 4°C for 6 months.
