## anti-Leukotriene B4 Receptor/BLT antibody (Alexa Fluor 488)

[Go to Product page](#)

### Overview

|              |                                                                            |
|--------------|----------------------------------------------------------------------------|
| Quantity:    | 100 µL                                                                     |
| Target:      | Leukotriene B4 Receptor/BLT (LTB4R)                                        |
| Reactivity:  | Human, Mouse, Rat                                                          |
| Host:        | Rabbit                                                                     |
| Clonality:   | Polyclonal                                                                 |
| Conjugate:   | This Leukotriene B4 Receptor/BLT antibody is conjugated to Alexa Fluor 488 |
| Application: | Please inquire                                                             |

### Product Details

|                   |                                     |
|-------------------|-------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus) |
| Characteristics:  | LT4R1 Conjugated Antibody           |

### Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | Leukotriene B4 Receptor/BLT (LTB4R)      |
| Alternative Name: | LT4R1 ( <a href="#">LTB4R Products</a> ) |

### Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF488 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
