## Overview

|              |                                                             |
|--------------|-------------------------------------------------------------|
| Quantity:    | 100 µL                                                      |
| Target:      | Doublecortin (DCX)                                          |
| Reactivity:  | Human                                                       |
| Host:        | Rabbit                                                      |
| Clonality:   | Polyclonal                                                  |
| Conjugate:   | This Doublecortin antibody is conjugated to Alexa Fluor 488 |
| Application: | Please inquire                                              |

## Product Details

|                   |                         |
|-------------------|-------------------------|
| Cross-Reactivity: | Human                   |
| Characteristics:  | DCX Conjugated Antibody |

## Target Details

|                   |                                      |
|-------------------|--------------------------------------|
| Target:           | Doublecortin (DCX)                   |
| Alternative Name: | DCX ( <a href="#">DCX Products</a> ) |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF488 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
