## Datasheet for ABIN682322 anti-Syncytin A (SYNA) antibody (Cy5)

Overview		
Quantity:	100 μL	
Target:	Syncytin A (SYNA)	
Reactivity:	Human	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	Cy5	
Application:	Western Blotting (WB)	
Product Details		
Immunogen:	KLH conjugated synthetic peptide derived from human Syncytin 1	
Isotype:	IgG	
Cross-Reactivity:	Human, Mouse	
Purification:	Purified by Protein A.	
Target Details		
Target:	Syncytin A (SYNA)	
Alternative Name:	Syncytin 1 (SYNA Products)	
Background:	Synonyms: ENV, ENVW, HERVW, ERVWE1, HERV7Q, HERV-7q, HERVWENV, HERV-W-ENV, Syncytin-1, Endogenous retrovirus group W member 1, Env-W, Envelope polyprotein gPr73, Enverin, HERV-7q Envelope protein, HERV-W envelope protein, HERV-W_7q21.2 provirus ancestral Env polyprotein, Syncytin, ERVW-1

	Background: This endogenous retroviral envelope protein has retained its original fusogenic		
	properties and participates in trophoblast fusion and the formation of a syncytium during		
	placenta morphogenesis. May induce fusion through binding of SLC1A4 and SLC1A5		
	(PubMed:10708449, PubMed:12050356, PubMed:23492904). Endogenous envelope proteins		
	may have kept, lost or modified their original function during evolution. Retroviral envelope		
	proteins mediate receptor recognition and membrane fusion during early infection. The surface		
	protein (SU) mediates receptor recognition, while the transmembrane protein (TM) acts as a		
	class I viral fusion protein. The protein may have at least 3 conformational states: pre-fusion		
	native state, pre-hairpin intermediate state, and post-fusion hairpin state. During viral and target		
	cell membrane fusion, the coiled coil regions (heptad repeats) assume a trimer-of-hairpins		
	structure, positioning the fusion peptide in close proximity to the C-terminal region of the		
	ectodomain. The formation of this structure appears to drive apposition and subsequent fusion		
	of membranes.		
Gene ID:	30816		
UniProt:	Q9UQF0		
Application Details			
Application Notes:	IF(IHC-P): 1:50-200		
	Optimal working dilution should be determined by the investigator.		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Concentration:	1 µg/µL		
Buffer:	Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.		
Preservative:	Sodium azide		
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.		
Storage:	-20 °C		
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
