## anti-Cyclin J antibody (Alexa Fluor 594)

[Go to Product page](#)

### Overview

|              |                                                         |
|--------------|---------------------------------------------------------|
| Quantity:    | 100 µL                                                  |
| Target:      | Cyclin J (CCNJ)                                         |
| Reactivity:  | Human                                                   |
| Host:        | Rabbit                                                  |
| Clonality:   | Polyclonal                                              |
| Conjugate:   | This Cyclin J antibody is conjugated to Alexa Fluor 594 |
| Application: | Please inquire                                          |

### Product Details

|                   |                          |
|-------------------|--------------------------|
| Cross-Reactivity: | Human                    |
| Characteristics:  | CCNJ Conjugated Antibody |

### Target Details

|                   |                                        |
|-------------------|----------------------------------------|
| Target:           | Cyclin J (CCNJ)                        |
| Alternative Name: | CCNJ ( <a href="#">CCNJ Products</a> ) |

### Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF594 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
