## anti-G Protein-Coupled Receptor 116 antibody (Alexa Fluor 594)

[Go to Product page](#)

### Overview

|             |                                                                               |
|-------------|-------------------------------------------------------------------------------|
| Quantity:   | 100 µL                                                                        |
| Target:     | G Protein-Coupled Receptor 116 (GPR116)                                       |
| Reactivity: | Human                                                                         |
| Host:       | Rabbit                                                                        |
| Clonality:  | Polyclonal                                                                    |
| Conjugate:  | This G Protein-Coupled Receptor 116 antibody is conjugated to Alexa Fluor 594 |

### Product Details

|                   |                            |
|-------------------|----------------------------|
| Cross-Reactivity: | Human                      |
| Characteristics:  | ADGRF5 Conjugated Antibody |

### Target Details

|                   |                                            |
|-------------------|--------------------------------------------|
| Target:           | G Protein-Coupled Receptor 116 (GPR116)    |
| Alternative Name: | ADGRF5 ( <a href="#">GPR116 Products</a> ) |
| Pathways:         | <a href="#">Carbohydrate Homeostasis</a>   |

### Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF594 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
