## Overview

|              |                                                    |
|--------------|----------------------------------------------------|
| Quantity:    | 100 µL                                             |
| Target:      | XPC                                                |
| Reactivity:  | Human                                              |
| Host:        | Rabbit                                             |
| Clonality:   | Polyclonal                                         |
| Conjugate:   | This XPC antibody is conjugated to Alexa Fluor 594 |
| Application: | Please inquire                                     |

## Product Details

|                   |                         |
|-------------------|-------------------------|
| Cross-Reactivity: | Human                   |
| Characteristics:  | XPC Conjugated Antibody |

## Target Details

|                   |                                                                   |
|-------------------|-------------------------------------------------------------------|
| Target:           | XPC                                                               |
| Alternative Name: | XPC ( <a href="#">XPC Products</a> )                              |
| Pathways:         | <a href="#">p53 Signaling</a> , <a href="#">DNA Damage Repair</a> |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF594 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
