## anti-Fibromodulin antibody (Alexa Fluor 594)

[Go to Product page](#)

### Overview

|              |                                                             |
|--------------|-------------------------------------------------------------|
| Quantity:    | 100 µL                                                      |
| Target:      | Fibromodulin (FMOD)                                         |
| Reactivity:  | Human, Rat, Mouse                                           |
| Host:        | Rabbit                                                      |
| Clonality:   | Polyclonal                                                  |
| Conjugate:   | This Fibromodulin antibody is conjugated to Alexa Fluor 594 |
| Application: | Please inquire                                              |

### Product Details

|                   |                                     |
|-------------------|-------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus) |
| Characteristics:  | FMOD Conjugated Antibody            |

### Target Details

|                   |                                                     |
|-------------------|-----------------------------------------------------|
| Target:           | Fibromodulin (FMOD)                                 |
| Alternative Name: | FMOD ( <a href="#">FMOD Products</a> )              |
| Pathways:         | <a href="#">Glycosaminoglycan Metabolic Process</a> |

### Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF594 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
