Target Details

Target:	CENPA
Alternative Name:	CENPA (CENPA Products)
Background:	Synonyms: CENP A, CENP-A, Centromere autoantigen A, Centromere protein A 17 kDa,

Target Details

centromere protein A, centromeric protein A, Histone H3 like centromeric protein A.

Background: Centromeres are the differentiated chromosomal domains that specify the mitotic behavior of chromosomes. CENPA encodes a centromere protein which contains a histone H3 related histone fold domain that is required for targeting to the centromere. CENPA is proposed to be a component of a modified nucleosome or nucleosome-like structure in which it replaces 1 or both copies of conventional histone H3 in the (H3-H4)₂ tetrameric core of the nucleosome particle. Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by RefSeq].
