

Datasheet for ABIN6836904

**anti-14-3-3 theta antibody (pSer232) (Alexa Fluor 594)**[Go to Product page](#)

## Overview

|                      |                                                             |
|----------------------|-------------------------------------------------------------|
| Quantity:            | 100 µL                                                      |
| Target:              | 14-3-3 theta (YWHAQ)                                        |
| Binding Specificity: | pSer232                                                     |
| Reactivity:          | Human                                                       |
| Host:                | Rabbit                                                      |
| Clonality:           | Polyclonal                                                  |
| Conjugate:           | This 14-3-3 theta antibody is conjugated to Alexa Fluor 594 |
| Application:         | Please inquire                                              |

## Product Details

|                   |                                                                  |
|-------------------|------------------------------------------------------------------|
| Cross-Reactivity: | Human                                                            |
| Characteristics:  | 14-3-3 theta/tau (Phospho-Ser232) Polyclonal Conjugated Antibody |

## Target Details

|                   |                                                                                   |
|-------------------|-----------------------------------------------------------------------------------|
| Target:           | 14-3-3 theta (YWHAQ)                                                              |
| Alternative Name: | 14-3-3 theta/tau ( <a href="#">YWHAQ Products</a> )                               |
| Pathways:         | <a href="#">Apoptosis</a> , <a href="#">Myometrial Relaxation and Contraction</a> |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF594 conjugated: most applications: 1: 50 - 1: 250 |
|--------------------|-----------------------------------------------------|
