## Overview

|              |                                                          |
|--------------|----------------------------------------------------------|
| Quantity:    | 100 µL                                                   |
| Target:      | CDT2/RAMP (DTL)                                          |
| Reactivity:  | Human                                                    |
| Host:        | Rabbit                                                   |
| Clonality:   | Polyclonal                                               |
| Conjugate:   | This CDT2/RAMP antibody is conjugated to Alexa Fluor 647 |
| Application: | Please inquire                                           |

## Product Details

|                   |                         |
|-------------------|-------------------------|
| Cross-Reactivity: | Human                   |
| Characteristics:  | DTL Conjugated Antibody |

## Target Details

|                   |                                      |
|-------------------|--------------------------------------|
| Target:           | CDT2/RAMP (DTL)                      |
| Alternative Name: | DTL ( <a href="#">DTL Products</a> ) |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF647 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
