## Overview

|              |                                                    |
|--------------|----------------------------------------------------|
| Quantity:    | 100 µL                                             |
| Target:      | FES                                                |
| Reactivity:  | Human, Mouse, Rat                                  |
| Host:        | Rabbit                                             |
| Clonality:   | Polyclonal                                         |
| Conjugate:   | This FES antibody is conjugated to Alexa Fluor 647 |
| Application: | Please inquire                                     |

## Product Details

|                   |                                     |
|-------------------|-------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus) |
| Characteristics:  | FES Conjugated Antibody             |

## Target Details

|                   |                                                                                                                                                                                             |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | FES                                                                                                                                                                                         |
| Alternative Name: | FES ( <a href="#">FES Products</a> )                                                                                                                                                        |
| Pathways:         | <a href="#">Regulation of Leukocyte Mediated Immunity</a> , <a href="#">Positive Regulation of Immune Effector Process</a> , <a href="#">Signaling Events mediated by VEGFR1 and VEGFR2</a> |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF647 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

## Handling

---

|          |      |
|----------|------|
| Storage: | 4 °C |
|----------|------|

---

|                  |                            |
|------------------|----------------------------|
| Storage Comment: | Store at 4°C for 6 months. |
|------------------|----------------------------|
