## Overview

|              |                                             |
|--------------|---------------------------------------------|
| Quantity:    | 100 µL                                      |
| Target:      | NOSIP                                       |
| Reactivity:  | Human                                       |
| Host:        | Rabbit                                      |
| Clonality:   | Polyclonal                                  |
| Conjugate:   | This NOSIP antibody is conjugated to Biotin |
| Application: | Please inquire                              |

## Product Details

|                   |                           |
|-------------------|---------------------------|
| Cross-Reactivity: | Human                     |
| Characteristics:  | NOSIP Conjugated Antibody |

## Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | NOSIP                                    |
| Alternative Name: | NOSIP ( <a href="#">NOSIP Products</a> ) |

## Application Details

|                    |                                                                                                                                                                                                           |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Notes: | Biotin conjugated: Working with enzyme-conjugated streptavidin. ELISA: 1: 200 - 1: 1,000; Western Blot: 1: 200 - 1: 1,000; IHC/ICC: 1: 100 - 1: 500; Flow Cytometry: 1: 50 - 1: 250; IF: 1: 100 - 1: 500. |
| Restrictions:      | For Research Use only                                                                                                                                                                                     |

## Handling

---

|          |      |
|----------|------|
| Storage: | 4 °C |
|----------|------|

---

|                  |                            |
|------------------|----------------------------|
| Storage Comment: | Store at 4°C for 6 months. |
|------------------|----------------------------|
