# Target Details

|          | Background: Angiogenesis inhibitor. Inhibits migration, proliferation and network formation by      |
|----------|---|
|          | endothelial cells as well as angiogenesis. This inhibitory effect is selective to endothelial cells |
|          | as it does not affect the migration of smooth muscle cells or fibroblasts. Does not affect the      |
|          | proliferation of cancer cells in vitro, but inhibits tumor growth and tumor angiogenesis. Acts in   |
|          | an autocrine manner. Inhibits artery neointimal formation and macrophage infiltration. Exhibits     |
|          | heparin-binding activity.   |
| Gene ID: | 22846   |
| UniProt: | Q7L8A9  |
