## Overview

|              |                                           |
|--------------|-------------------------------------------|
| Quantity:    | 100 µL                                    |
| Target:      | NMS                                       |
| Reactivity:  | Human                                     |
| Host:        | Rabbit                                    |
| Clonality:   | Polyclonal                                |
| Conjugate:   | This NMS antibody is conjugated to Biotin |
| Application: | Please inquire                            |

## Product Details

|                   |                         |
|-------------------|-------------------------|
| Cross-Reactivity: | Human                   |
| Characteristics:  | NMS Conjugated Antibody |

## Target Details

|                   |                                      |
|-------------------|--------------------------------------|
| Target:           | NMS                                  |
| Alternative Name: | NMS ( <a href="#">NMS Products</a> ) |

## Application Details

|                    |                                                                                                                                                                                                           |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Notes: | Biotin conjugated: Working with enzyme-conjugated streptavidin. ELISA: 1: 200 - 1: 1,000; Western Blot: 1: 200 - 1: 1,000; IHC/ICC: 1: 100 - 1: 500; Flow Cytometry: 1: 50 - 1: 250; IF: 1: 100 - 1: 500. |
| Restrictions:      | For Research Use only                                                                                                                                                                                     |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
