

Datasheet for ABIN6902431

**anti-Orosomucoid 2 antibody (Alexa Fluor 680)**[Go to Product page](#)

## Overview

|              |                                                              |
|--------------|--------------------------------------------------------------|
| Quantity:    | 100 µL                                                       |
| Target:      | Orosomucoid 2 (ORM2)                                         |
| Reactivity:  | Human                                                        |
| Host:        | Rabbit                                                       |
| Clonality:   | Polyclonal                                                   |
| Conjugate:   | This Orosomucoid 2 antibody is conjugated to Alexa Fluor 680 |
| Application: | Please inquire                                               |

## Product Details

|                   |                                                            |
|-------------------|------------------------------------------------------------|
| Cross-Reactivity: | Human                                                      |
| Characteristics:  | Alpha-1-acid glycoprotein 2 Polyclonal Conjugated Antibody |

## Target Details

|                   |                                                               |
|-------------------|---------------------------------------------------------------|
| Target:           | Orosomucoid 2 (ORM2)                                          |
| Alternative Name: | Alpha-1-acid glycoprotein 2 ( <a href="#">ORM2 Products</a> ) |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF680 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
