

Datasheet for ABIN6904406

**Recombinant anti-Calretinin antibody (Alexa Fluor 680)**[Go to Product page](#)

## Overview

|                |                                                           |
|----------------|-----------------------------------------------------------|
| Quantity:      | 100 µL                                                    |
| Target:        | Calretinin (CALB2)                                        |
| Reactivity:    | Human, Mouse, Rat                                         |
| Host:          | Rabbit                                                    |
| Antibody Type: | Recombinant Antibody                                      |
| Clonality:     | Monoclonal                                                |
| Conjugate:     | This Calretinin antibody is conjugated to Alexa Fluor 680 |
| Application:   | Please inquire                                            |

## Product Details

|                   |                                     |
|-------------------|-------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus) |
| Characteristics:  | Calretinin Conjugated Antibody      |

## Target Details

|                   |                                               |
|-------------------|-----------------------------------------------|
| Target:           | Calretinin (CALB2)                            |
| Alternative Name: | Calretinin ( <a href="#">CALB2 Products</a> ) |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF680 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
