

Datasheet for ABIN6916708

**anti-CRYAA antibody (Alexa Fluor 647)**[Go to Product page](#)

## Overview

|              |                                                      |
|--------------|------------------------------------------------------|
| Quantity:    | 100 µL                                               |
| Target:      | CRYAA                                                |
| Reactivity:  | Human, Rat, Mouse                                    |
| Host:        | Rabbit                                               |
| Clonality:   | Polyclonal                                           |
| Conjugate:   | This CRYAA antibody is conjugated to Alexa Fluor 647 |
| Application: | Please inquire                                       |

## Product Details

|                   |                                     |
|-------------------|-------------------------------------|
| Cross-Reactivity: | Human, Mouse (Murine), Rat (Rattus) |
| Characteristics:  | CRYAA Conjugated Antibody           |

## Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | CRYAA                                    |
| Alternative Name: | CRYAA ( <a href="#">CRYAA Products</a> ) |
| Pathways:         | <a href="#">M Phase</a>                  |

## Application Details

|                    |                                                     |
|--------------------|-----------------------------------------------------|
| Application Notes: | AF647 conjugated: most applications: 1: 50 - 1: 250 |
| Restrictions:      | For Research Use only                               |

Handling

---

|                  |                            |
|------------------|----------------------------|
| Storage:         | 4 °C                       |
| Storage Comment: | Store at 4°C for 6 months. |
